COVID-19 Safety Measures for our Guests

Your safety is of the utmost importance to us. The purpose of this event is to give families a way to allow their children to trick-or-treat and enjoy fun Halloween decorations, without having to congregate in large groups where social distancing is difficult to monitor.

Keeping you safe:

- Guests will register online so we can regulate traffic control in segments.
- We will have a touch-free RSVP and check in process.
- Guests will wait in their car in a holding area until it is their time to drive through.
- A staff member will ask you for the number of children in your car. They will place a number on your windshield so that businesses know how many kids will be trick-or-treating from your car.
- The speed limit is a strict 5 miles per hour when driving through.
- We will not allow any shocking/surprising actors to jump out and scare you for the safety of the driver.
- All candy, treats and gifts will be wrapped.
- We will have candy monitors that will watch as all vendors OPEN bags to ensure they have gloves on their hands and masks on their faces.
- All candy handlers will have gloves and masks on when handing out candy to trick-or-treaters.
- Restrooms, sinks and sanitizing stations will be available.
